SUMMARY

I am an active Informatics Engineering student at Universitas Brawijaya with a strong interest in data analysis, scientific research, and technology-driven innovation. I have actively participated in academic and extracurricular activities, contributing to projects that foster creativity and support my interests and passion in data, machine learning, and artificial intelligence.

EDUCATION

Universitas Brawijaya - Malang

Agustus 2022 - Present

Bachelor's Degree Candidate in Informatics Engineering

IPK 3.8/4.00

EXPERIENCE

DBS CODING CAMP 2025

February 2025 - August 2025

Machine Learning Engineering

- Selected as one of the Top 140 participants out of more than 2,200 participants in an intensive machine learning program. Contributed as a Lead Tutor in technical learning and collaborative projects.
- Developed machine learning and deep learning models using Scikit-Learn and PyTorch.
- Built recommendation systems and Retrieval-Augmented Generation (RAG) systems using Sentence-BERT and FAISS.

Badan Pusat Statistika Kota Batu

Mei 2025 - Juli 2025

Data Scientist - Internship

- Developed a horticultural production forecasting system using Prophet to support regional food security analysis.
- Built a forecasting model API using FastAPI and prepared production-ready JSON data formats.
- Evaluated prediction results and interpreted data for stakeholder needs.
- Participated in location tagging for infrastructure and MSMEs to validate field spatial data.

PROJECT

- Measurement and Reduction of Hallucinations in RAG-based LLMs
- RAG-based Nutriplan recommendation system and chatbot
- Personality Classifier using CI/CD, MLflow, and Docker
- Human Activity Time-Series Classification using MLP and Backpropagation
- Horticultural Crop Forecasting using Prophet and FastAPI
- CTU-13 Network Traffic Classification using MLP

CERTIFICATION

- AWS Academy Data Engineering, AWS, May 23, 2025
- Data Analysis with Python, Dicoding Indonesia, March 2025
- Structured Query Language (SQL), Dicoding Indonesia, March 2025
- Data Visualization, Dicoding Indonesia, March 2025
- Machine Learning Development, Dicoding Indonesia, April 24, 2025
- Microsoft Office Desktop Application, Trust Training Partner, 26 August 2025

SKILL

- Technical Skills: Python, SQL, LLM, Docker, RAG, Vector Store, CI/CD, Machine Learning & AI
- Languages: Indonesian, English
